

STUDENT FORUM

Main idea

The main idea of the project is a platform where students from different institution can share questions, answers and projects about topics discussed in class.

Motivation

I choose this project out of my interest for EdTech and in a desire to bridge the distance between students from all walk of life.

Project Goals

- Provide a platform for the sharing of perspective relating to their course of student
- Foster interaction between students from different universities
- Facilitate the building of student community

Project Tech Stack

React, Nodejs
